Tuscia University – DISTU Department

With the patronage of:

the Rome Superintendent's Office for Archaeology

Fine Arts and Landscaping Viterbo Province and South Etruria

SAMI (Society of Italian Medieval Archaeologists)

Carivit Foundation

the Chestnut Festival Public Body in Soriano nel Cimino

In the previous five conferences called 'The City and the Houses' (Città della Pieve, 1990; Città della Pieve, 1992; Città della Pieve, 1996; Viterbo-Vetralla 2004; Orte 2013) (the pdfs of these volumes are available at www.storiadellacitta.it), edited by Elisabetta De Minicis and Enrico Guidoni, a systematic survey of the various, predominantly regional, areas was presented in order to obtain an important picture of original existing structures on Italian territory, thus initiating a dialogue between different disciplines such as Medieval Archaeology, the History of Urban Planning and Architecture.

In medieval towns, especially in those newly founded or in expanding hamlets, with significant relationships with their respective rural areas, the house is an expression of the methods used for its actual construction in line with - or in open contrast to - established practices or precise regulations. The outcome of construction practices or regulations, often detectable in the masonry, expresses the attention paid to adjacent houses, to public streets, and to both internal and external private spaces. Every European region favours construction methods and knowledge, relationships with their contexts or pre-existing ones, following traditions that reflect not only the consolidation of long-term processes, but also influences and interactions with areas with which Europe liaised during the Middle Ages.

Through this new meeting of scholars from various Italian and foreign universities, the proposal is to exchange ideas on the similarities or differences in the mechanisms underlying the construction of houses, their planning, and the ways they were used.

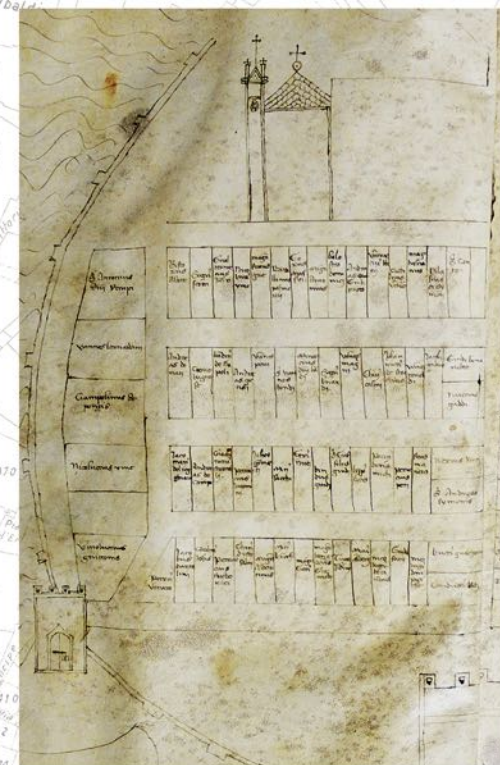

ORGANIZING SECRETARY:

Giancarlo Pastura, Matteo Serpetti

Construction, urban characteristics and rules
in medieval Girona.

Medieval civil construction in east Lombardy:
observations on building techniques between
influences and peculiarities.

Examples of late medieval residential
buildings in the Marche region.
A counterpoint between towns and castles.

Regulations, functions and spaces in the houses
of the late Middle Ages in north-eastern Italy.

Medieval urban houses and water in Polish Lands
(14th-15th centuries).

Domus, domucella, casamentum.
Residential construction in Emilia-Romagna
(8th-14th centuries) between written
and archaeological sources.

Residential construction in central-eastern
Tuscany: spaces, forms and socio-settlement
interactions.

Models of urban development between the 12th
and 14th centuries: the case studies of Pistoia and
Prato compared to major communal cities in Tuscany.

Study of medieval tower houses in the Cantabrian
regions of northern Spain. Typology and the
relationship with the structures of villas
(12th-15th centuries).

Building from scratch in medieval Portugal: cities
and houses. Materials, programmes and regulations.

Medieval housing in the towns of
northern Lazio and southern Umbria.

Medieval towns in northern Lazio
(12th-15th centuries). Urban development
and spatial organisation.

PAUL ARTHUR

SALENTO UNIVERSITY

Between Rome and Lazio.
The dissemination and use of
architectural models and building techniques
between the 12th and 14th centuries.

Methods of building, forms and ways
of living in the Lazio limestone region.

Building methods and ways of living along
the central Apennines, some examples
between the Regnum and the Church State,
following the using of limestone.

Peculiarities of residential construction
between the 12th and 14th centuries
in Campania and Basilicata.

Topography and construction in the
coastal area of Naples between the 12th and
14th centuries: the case of the excavation
of Piazza Nicola Amore.

Angevin-era building around Castel Nuovo:
archaeological evidence from the
Piazza Municipio excavations.

Houses and villages in Calabria. Various
cultures of medieval living between codes
and community customs.

Residential buildings in the urban centres of
central-northern Puglia between archaeological
documents and written sources (12th-14th cent.).
material characteristics, types, functions.
Structures, infrastructures and urban spaces
in medieval Sicily (10th-15th cent.).

Late medieval residential building in Terra
d'Otranto: materials, construction techniques
and architectural design.

Houses and cities in the Islamic Mediterranean
(8th-14th centuries).

Closing speech.
